Verified Test Credentials Matrix (Live ERPNext Server)

ROLE & PROGRAM	LOGIN EMAIL	PASSWORD	ASSIGNED SCOPE
ABBOTT MEDREP	vltamayo@profindights.biz	UEPCS101c!	Territory AD0104 (Vina Tamayo)
BAYER MEDREP	arlaneferraren8@gmail.com	UEPCS101c!	Territory BA1-05 (Arlane Ferraren)
RITEMED MEDREP	rbgajo@pims-marketing.com	pims@admin	Territory RM101 (Riegel Gajo)
SFE SPECIALIST	lesantos@pims-marketing.com	pims@admin	National SFE Review & Remap Hub

💡 Zero-Logout SFE Preview Shortcut: In the Mobile App, open the left navigation drawer and tap "Switch to SFE Preview" at the bottom. This immediately enables SFE review, rejection, and remapping tools without signing out!

2

Phase 1: MedRep Program Selection & Facility Proposal

A. Program Selection & Auto-Detect

MEDREP

- Auto-Detection:** Upon sign-in, the app auto-assigns the rep's active program (**Abbott** , **Bayer** , or **RiteMed**).
- Manual Switching:** In the Doctor Profiling Wizard (Step 3) or top AppBar, tap the **Account/Program** dropdown to switch lines.
- Territory Alignment:** Automatically updates DSM approvers and program survey templates.

B. Propose New Healthcare Facility

SUBMISSION

- Direct Hub:** Drawer → **Institution Submission** → tap + **Propose New Facility**.
- In-Wizard (Step 2):** During doctor profiling, tap "Can't find institution? Propose New Facility".
- Required Fields:** Facility Name, Type (Hospital/Clinic), City/Municipality, Province, Address.
- Immediate Unblocked Profiling:** Saved as **Pending Approval** ; rep can profile doctors immediately (amber badge indicator).

3

Phase 2: SFE Review, Rejection & Cause Note Specification

A. Auditing Pending Proposals

SFE REVIEW

- Open SFE Hub:** Log in as **lesantos@pims-marketing.com** (or tap *Switch to SFE Preview*).
- Filter Queue:** Open **Institution Submission** → tap **Pending Approval** tab.
- Inspect Facility:** Tap the target proposal card to inspect address details and submitting MedRep.

B. Rejecting with Mandatory Cause Note

AUDIT TRAIL

- Trigger Rejection:** Tap the red **Reject Facility** button on the card.
- Enter Cause Note:** Enter specific actionable feedback (e.g., "Duplicate facility: already verified under 'Metro General Hospital'. Please select approved entry.").
- Commit:** Tap **Confirm Rejection**. The status in ERPNext updates to **Rejected** with full audit trail.

4 Phase 3: Lockscreen Alert & Profiling Block Simulation

A. Lockscreen & Heads-Up Push Alert

NOTIFICATION

- Background Sync:** Periodic sync checks for rejected proposals submitted by the active user.
- 1-Tap Instant Simulation:** In **Institution Submission**, tap the **Amber Bell Icon (🔔)** in the top AppBar.
- System Banner Alert:** Pops up immediately on lockscreen/banner:

🔔 Institution Proposal Rejected

'Metro Specialty Clinic' was rejected by SFE: Duplicate facility. Tap to review.
- Direct Navigation:** Tapping the alert opens the facility rejection card and cause note.

B. Strict Profiling Block Enforcement

FIELD GUARD

- Workflow Block:** When the MedRep attempts to submit an HCP profile linked to the rejected facility, submission is strictly blocked.
- Validation Modal:** A prominent error prompt alerts the MedRep:

🚫 Workplace Rejected by SFE:

The workplace selected for this doctor was rejected by SFE ("Duplicate facility..."). You must modify the workplace or wait for an SFE remap before profiling can be finalized.
- Zero Data Loss:** The doctor profile draft remains safely preserved in local SQLite storage.

5 Phase 4: SFE Facility Remapping & Finalizing Doctor Profiling

A. SFE Facility Remapping Execution

SFE LEAD

- Locate Rejected Facility:** Open **Institution Submission** as SFE → filter by **Rejected** tab.
- Launch Remap Modal:** Tap the rejected facility card → tap **Change / Remap for MedRep**.
- Select Approved Master:** Search the verified national masterlist (e.g. *Metro General Hospital*) and select it.
- Add Resolution Note:** Enter an audit note: *"Remapped duplicate to verified masterlist hospital"*.
- Confirm:** Tap **Confirm Remapping** to persist the change.

B. MedRep Unblocked & Final Profiling

RESOLVED

- Automatic Re-linking:** The system automatically updates all linked doctor profile submissions to the approved facility ID.
- Block Cleared:** The red block banner clears on the MedRep's doctor draft.
- Submit Profile:** MedRep opens the doctor draft → Step 4 Review → taps **Submit for Processing**.
- Clean ERPNext Commit:** The doctor profile commits directly to ERPNext with approved masterlist affiliation—no manual rework required!

✓ 5-Minute Live Simulation Verification Checklist

STATUS	TEST SCENARIO	ACTION PERFORMED	VERIFIED LIVE RESULT
PASSED	1. Program Auto-Detect	Sign in with <code>vltamayo@profinsights.biz</code>	Auto-loads Abbott Diabetes Care & Territory AD0104
