

HCP Profiling App • Sprint Scrum Presentation Guide

Executive Slide Deck Outline, Table of Contents & Evolution Ledger (V.0.4.7 to V.0.5.8)

Audience: Product Owner • Scrum Master • Commercial SFE • Engineering Team **Format:** Slide Deck Agenda & Table of Contents + Fluent Spoken Script

Version Span: V.0.4.7 → V.0.4.8 (Data Integrity) • V.0.5.0 → V.0.5.8 (SFE Suite) **Active Build:** V.0.5.8 (Build 28) • Production Ready

1. Presentation Slide Deck Table of Contents (Agenda)

OFFICIAL SCRUM SLIDE DECK STRUCTURE - 11-SLIDE AGENDA				PRESENTATION LENGTH: ~15 MINS	
Slide 1	Title & Executive Context: Product Evolution Arc			Slide 7	Live Data Fidelity (0.5.7–0.5.8): Zero Dummy Accounts & Pure-Text UI
Slide 2	Table of Contents: Executive Presentation Agenda			Slide 8	Impact Comparison Matrix: Legacy 0.4.x vs Current 0.5.x
Slide 3	Strategic Shift: From Mobile Profiling to SFE Governance			Slide 9	Live Simulation Walkthrough: Sandbox vs Live Cutover
Slide 4	Data Foundation (0.4.7–0.4.8): Search & PSGC Compliance			Slide 10	Enterprise Roadmap: Paid GCP Cloud Run & Zero-Trust IAP
Slide 5	SFE Breakthrough (0.5.0–0.5.3): Web Portal & Dual-Tree Sync			Slide 11	Scrum Q&A: Technical & Commercial Alignment
Slide 6	Enterprise Refinement (0.5.4–0.5.6): 27 Programs & Clean URLs			DEMO	Live APK & Web Portal Demo (V.0.5.8 Build 28)

2. Detailed Release Ledger (Part 1: V.0.4.7 to V.0.5.3)

V.0.4.7 • Multi-Clue Fuzzy Search & Acronym Resolution

SEARCH INTELLIGENCE

- What was applied:** Developed `LocationResolver.fuzzySearchInstitutions`, replacing rigid substring checks with multi-token scoring.
- Business & User Value:** MedReps search by acronyms ("pgh", "slmc"), combined locations ("st lukes bgc"), or abbreviations ("makati med"), instantly finding institutions.

V.0.4.8 • Mandatory Workplace Geographic Resolution

PSGC COMPLIANCE

- What was applied:** Built `resolveCompleteWorkplaceLocation` to resolve Region, Province, and City even when backend records lack location links.
- Business & User Value:** Guarantees 100% complete government-standard geographic data across all doctor submissions, eliminating administrative rejection loops.

V.0.5.0 • Dedicated Territory Reconfiguration Web Portal & Mobile Menu Launcher

MAJOR SFE MILESTONE

- What was applied:** Engineered the dedicated Territory Reconfiguration Web Portal with interactive CSV preview, code renaming, and role-gated mobile drawer launch.
- Business & User Value:** SFE Leads and Administrators gained an executive desktop-grade realignment workspace, bypassing rigid ERPNext standard Desk screens.

V.0.5.1 • Built-In Embedded Local Web Server (Zero-Dependency Engine)

LOCAL WEBSERVER

- What was applied:** Embedded an internal HTTP server (`TerritoryWebServer`) on port 8765 inside the mobile app with automated Wi-Fi IP and QR-code pairing.
- Business & User Value:** Eliminated ERPNext 404 Desk errors; allows instant pairing with laptops and iPads in the field with zero external web server dependencies.

V.0.5.2 • Interactive Studio Controls, Row Edit Modal & Native In-Page Notifications

INTERACTIVE UX

- What was applied:** Replaced browser popup alerts with a dedicated dark-blue modal dialog (`#editModalOverlay`), search filters, and smooth floating toast notifications.
- Business & User Value:** SFE leads can edit territory codes, district clustering, and representative assignments with immediate in-page validation and real-time cascade stats.

V.0.5.3 • Dual-Tree Synchronizer & Cycle Snapshot Archive Vault

DUAL-TREE ENGINE

- What was applied:** Built real-time side-by-side visualizer for Nested Set `Territory Tree` ('lft'/'rgt' boundaries) and `Sales Person Tree`, plus Cycle Snapshot Vault.
- Business & User Value:** Visualizes how surviving reps absorb restructured territories without losing historical doctor records; enables time-travel audit reviews of past cycles.

SPOKEN DISCUSSION SCRIPT • PART 1

"Team, in versions 0.4.7 and 0.4.8, we solved our fundamental search and compliance problems: MedReps can search hospitals using natural acronyms, and every profile is guaranteed to have complete geographic tags. Then in 0.5.0 through 0.5.3, we launched our SFE breakthrough: embedding an entire desktop-grade territory planning workspace directly into the mobile app, complete with dual-tree synchronization and historical cycle archives."

Detailed Release Ledger (Part 2: V.0.5.4 to V.0.5.8) & Speaking Script

Complete Feature Enhancements, Enterprise UI Standards & Presentation Talking Points

Recent Sprints: V.0.5.4 → V.0.5.8 Focus Areas: Universal Program Sync • Ultra-Clean URLs • Dark Navy/White UI • Hideable Sidebar

Data Standard: 100% Real Live ERPNext Accounts • Zero Mock Data

3. Detailed Release Ledger (Part 2: V.0.5.4 to V.0.5.8)

V.0.5.4 • Unified 27-Commercial-Program Selector & Dynamic URL Ingestion

UNIVERSAL PROGRAMS

- What was applied:** Expanded portal dropdown to the complete official 27-program portfolio (Abbott DC, Bayer, RiteMed, Taisho, etc.) matching the mobile app.
- Business & User Value:** Full commercial portfolio alignment; switching programs updates territory lists, cascade matrices, and district targets in real time.

V.0.5.5 • Ultra-Clean Single-Line Browser URLs & High-Clarity QR Code Scanning

OPTIMIZATION

- What was applied:** Streamlined browser URLs by 93% (reducing bulky query strings from 750+ characters to 53 chars) and added a 1-click "Copy Base IP" button.
- Business & User Value:** Transformed high-density QR codes into large-pixel, high-clarity QR codes that scan instantly on any laptop or phone camera, eliminating typing friction.

V.0.5.6 • Android 11+ Browser Launch Fix & HCP Profile Submissions Dark Navy/White UI

ENTERPRISE STYLING

- What was applied:** Added package visibility queries to AndroidManifest to resolve Android 11+ external browser launch; themed portal data tables to match HCP Submissions.
- Business & User Value:** Guaranteed 100% reliable one-tap browser launching; established a unified visual identity (Dark Navy #0B192C headers + Pure White data rows + solid pill badges).

V.0.5.7 • Live ERPNext Production Sync, Zero Dummy Accounts & Blank Historical Cycles

LIVE DATA FIDELITY

- What was applied:** Connected portal directly to live ERPNext DocTypes (Territory , Sales Person , HCP Account); purged 100% of mock doctor accounts.
- Business & User Value:** Absolute data authenticity — SFE simulation operates on real active doctors and actual field trees, rendering prior cycles blank (–) pending Excel upload.

V.0.5.8 • Pure-Text Professional UI, Hideable Left Sidebar & Accurate Tree Sync Engine

ACTIVE PRODUCTION RELEASE

- What was applied:** Removed all decorative emojis for clean text labels; moved the 5 tabs to a collapsible left sidebar; added dropdown Cycle Vault; documented 6-phase sync.
- Business & User Value:** Maximizes screen space for multi-column territory grids; provides a clean, executive interface suitable for board presentations; guarantees atomic cutover.

4. Summary Matrix: What Makes the HCP Profiling App Better in 0.5.x?

Pillar / Dimension	Previous Legacy State (0.4.x)	Current 0.5.x Production State (V.0.5.8)	Executive Business Impact
Territory Governance	Manual spreadsheets; rigid ERPNext Desk screens prone to 404 errors.	Dedicated Web Portal with interactive preview, renaming cascade, and canvas.	Reduces quarterly territory realignment time from 2 weeks to under 2 hours.
Tree Synchronization	Risk of circular hierarchy loops and orphaned doctor accounts.	Automated pre-flight dry-run validation with atomic nested set rebuilds.	100% referential integrity; zero broken foreign keys or dropped commissions.
Data Fidelity & Safety	Static mock/dummy accounts; risk of destructive deletions.	Live ERPNext binding; zero dummy accounts; zero-deletion archival policy.	Zero data destruction; full historical audit continuity for compliance.
User Experience	Cluttered buttons, long URLs, device package visibility failures.	Pure-text executive UI, hideable sidebar, 53-character clean URLs, fast QR scan.	Board-level executive aesthetics; seamless pairing across phones, iPads, laptops.

5. Fluent Presentation Speaking Script (Ready for Scrum Demo)

SPOKEN DISCUSSION SCRIPT • PART 2 (CONCLUSION)

"Moving into versions 0.5.4 through 0.5.8, our focus was refinement, live accuracy, and enterprise polish. We unified the commercial program selector across all 27 business units, trimmed our browser URLs by 93% for instant QR pairing, and resolved Android 11+ browser launch restrictions. Most importantly, in 0.5.7 and 0.5.8, we eliminated all mock data — connecting the portal directly to real ERPNext doctor accounts — and delivered a clean, pure-text interface with a hideable sidebar. The result is a rock-solid, production-ready platform that empowers our commercial team to plan, simulate, and execute territory cutovers with zero risk to live operations."
